

# images are not decoration.

(the imagery project)

For this project, you will:

- make a work that uses imagery to add content to the work
- do not use your imagery to merely “decorate” the surface
- use the images as a way to magnify the power, scope, and purpose of the work

think of all the possible connotations of the images or words you use.

think of associations.

what do you want to say with the clay?

just say it . . . come on . . . say it . . .
